U. S. PATENT OFFICE

FOREWORD

The utensils listed herein are those which experience has shown to be most practical as to type, size, and weight. L & G Hotel Retinned Ware is made of heavy gauge steel, retinned by the Hot-Dip method. Only the purest grade of Pig Tin is used, assuring the high quality surface finish.

All dimensions given are approximate; capacities are trade capacities and not guaranteed to be accurate. Net weights have been added as part of the specifications to assist in estimating transportation costs. These weights are approximate and not to be interpreted as indicating the actual weight of any given single unit.

Particular attention is called to our Crusader and L & G Stainless Wares. A separate catalog may be obtained upon request illustrating Crusader solid Stainless Wares designed for storage and service purposes; and Crusader 3-Ply cooking utensils. When better grade, long lasting corrosion resisting utensils are desired, see our Crusader Stainless catalog.

A specialty is made of fabricating articles made to customers' specification when the quantity required allows for economical production. Equipment including the country's largest deep drawing press affords wide capacity for special cylindrical, rectangular and square shapes — blank capacity up to 68 inches.

Design Division

FOREWORD

The utensils listed herein are those which experience has shown to be most practical as to type, size, and weight. L & G Hotel Retinned Ware is made of heavy gauge steel, retinned by the Hot-Dip method. Only the purest grade of Pig Tin is used, assuring the high quality surface finish.

All dimensions given are approximate; capacities are trade capacities and not guaranteed to be accurate. Net weights have been added as part of the specifications to assist in estimating transportation costs. These weights are approximate and not to be interpreted as indicating the actual weight of any given single unit.

Particular attention is called to our Crusader and L & G Stainless Wares. A separate catalog may be obtained upon request illustrating Crusader solid Stainless Wares designed for storage and service purposes; and Crusader 3-Ply cooking utensils. When better grade, long lasting corrosion resisting utensils are desired, see our Crusader Stainless catalog.

A specialty is made of fabricating articles made to customers' specification when the quantity required allows for economical production. Equipment including the country's largest deep drawing press affords wide capacity for special cylindrical, rectangular and square shapes — blank capacity up to 68 inches.
